selection of clients, projects:

24SevenOffice (24sevenoffice.com)
2018 Q4 – 2019 Q1
- Backend development
- SaaS-based ERP system for which I developed high quality Node.js microservices. Working together with Backend / DevOps developers to port the current (PHP, monolith) backend.
- JavaScript, TypeScript, Node.js, REST
- Docker, Unit testing, Integration testing

Yuge (www.goyuge.com)
2015 Q1 – 2018 Q4
- Lead developer, Co-founder, CTO
- E-commerce platform for shops / boutiques in Barcelona and Amsterdam. As CTO responsible for both architecture and development of web, backend and iOS.
- iOS, Swift
- HTML, CSS3, SCSS, Javascript, React, Webpack
- Node.js, REST, Gulp, AWS, Docker

CODEDAZUR (www.codedazur.com)
2016 Q1 – 2016 Q3
- Frontend development
- Supplied development for multiple smaller websites like KLM (nachtjeslampje.klm.com), RedBull (artofcamping.redbull.com), Governance (gezondenveiligwerkt.nl).
- HTML5, CSS3, SASS, Bootstrap, Javascript, JQuery, Backbone, Webpack
- Node.js, PHP, Laravel, GIT

Grey Benelux (www.grey.com/benelux)
2015 Q1 – 2015 Q3
- Frontend development, Node.js development
- Within a Scrum team of 7 people, supplied both frontend and Node.js development for a single page iOS iPad application targeting the sales teams of Isentress (www.isentress.com)
- HTML5, CSS3, SCSS, Javascript, iOS
- Node.js, Grunt, GIT

Ahold, Allerhande (www.ah.nl/allerhande)
2013 Q2 – 2014 Q3
- Frontend development
- Within a Scrum team of 10+ people, including visual designers, interactive designers, testers and frontend developers, been responsible for the implementation of 'user stories'. Besides improving the existing codebase and frontend infrastructure.
- HTML5, CSS3, Sass, JavaScript, JQuery, Backbone, Grunt
- Mac OS X Server, Vagrant, Jenkins, GIT

TJUNKS (www.tjunks.com)
2012 Q3 – 2013 Q2
- Frontend development, Functional and Visual design
- Been responsible for the development and stability of the desktop web application which focused on the consumption of video. The web application was completely standalone, communicating with the backend using REST protocols. The complete team included 5 developers and ± 3 other disciplines working according to Agile methodologies.
- PHP, Zend Framework
- HTML5, CSS3, Less, JavaScript, JQuery, Backbone
- Apache, Linux, REST, Amazon Web Services, GIT

BedrijfsEtalage (www.bedrijfsetalage.nl)
2009 Q1 – 2012 Q2
- Lead development / System administration
- Starting from the inception, for a period of multiple years, been involved in setting up the team, infrastructure and codebases, with the goal to support the multiple SaaS products targeting SMEs. Responsible for both team communication and the technical side of the organisation, including the complete freedom to select the used technologies.
- PHP, CakePHP
- HTML, CSS, JavaScript, JQuery
- GIT
- Apache, Linux
